DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 11 and 17 rejected under 35 U.S.C. 102(e) as being anticipated by Hattori et al. (U.S. 6,515,725).

As to claim 11, note figure 6. Figure 6 shows a transparent electrode 127 formed on substrate 105, column spacer 142 formed on the transparent electrode, and an alignment layer 139 formed also formed on the substrate. No alignment layer is formed overlying or underlying the column spacer 142. See column 16, lines 30-57.

As to claim 17, note figure 6. Figure 6 shows a transparent electrode 127 formed on substrate 105, column spacer 142 formed on the transparent electrode, and an

alignment layer 139 formed also formed on the substrate. The column spacer 142 is provided such that one end is in direct contact with the transparent electrode 127, and the other end is in direct contact with interlayer insulating layer 100.

Allowable Subject Matter

Claims 12-16 allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As to claims 12, 15, and 16, the prior art of record did not teach or suggest providing a transflective display wherein column spacers are provided on the alignment layer so as to be in contact with the reflection section on the second substrate.

As to claims 13 and 14, the prior art of record did not teach or suggest providing apertures in a black matrix and using those apertures only as a mask to form the column spacers.

Response to Arguments

Applicant's arguments with respect to claim 11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Chung whose telephone number is (571) 272-2288. The examiner can normally be reached Monday-Friday 9:30 am to 6:00 pm.
